## 2022

## Our Mission

is to reduce the operational costs and ecological footprint of hospitals, by providing the most advanced, durable, and high-quality logistical solutions available on the market.

## Our Vision

We envision a world in which we can provide any health care facility, anywhere in the world, with ergonomic ISO-modular furniture that supports the in-house logistical processes. We aspire to be the global market leader in the field of integrated logistic solutions for the healthcare market by tailoring our products to our customers needs, and the needs of the planet.

# Its name reflects its programme

## Our modular system

The base of ScanModul's success is a modular system that we introduced in the year 1970 which has meanwhile become the industry standard. Based on a 60 cm x 40 cm grid, we developed baskets and trays in various materials for the use in the healthcare sector, which perfectly matched our trolleys and cabinets.

Full size modul  
**40/60**

Half size modul  
**30/40**

In the course of time, ½ modules were added. This sophisticated system enables us – working together with our customers – to develop integrated logistics solutions for conceivable tasks. Here in the catalogue the modules are marked with M for a Full-Size module and M/2 for a Half-size module. The matching furniture types are marked with letters a, b, c and d for a better overview.

Shelves

# Established 1912

We started with hospital furniture and equipment in Denmark

Founded in 1912 by the silversmith Georg Larsson the company soon specialized in supplying beds and other equipment to Danish hospitals. Ole Larsson continued in his father’s footsteps in 1940. The company moved on in specializing production with a very extensive product range for use in the hospital and nursing home sector.

## Milestone in the company’s history

In the early **1970s** a revolutionary modular storage concept was developed and introduced to the Scandinavian market. The ISO standard for 400 x 600 mm modules is based on this system, which was named the “Scan Modul System”. This system is the base for the further development of the company, refined over all the years, winning knowledge and experience. Several complementary products came up, building the todays end-to-end supply management system.

1912

Foundation by Georg Larsson as blacksmith company – catering products in healthcare

1940

Ole Larsson takes over responsibility. Product expansion to hospital beds, trolleys and cabinets

1970

Development of 60 x 40 cm storage concept; introduction as brand ScanModul System

1974

Klaus Larsson CEO & owner

**ScanModul® today**

As the inventor and largest vendor in the field of modular System, ScanModul® is proud of its leadership position. With the headquarter and it’s modern production facility in Houten, The Netherlands ScanModul® today continues to fulfill the needs of more than 8 000 customers in health-care worldwide, with an eye on operational excellence and the people it is supposed to support in their daily work.

**Continuing our successful journey**

ScanModul® prides itself on having excellent quality and the broadest product portfolio in the industry. Innovations and the continuing extension of the product range bring ScanModul® close to its vision: Providing the healthcare sector worldwide with all storage and transportation needs by offering high quality, ergonomic products and premium service. Enabling high availability of products, reduce waste of overdue stock, time needed for replenishment and reduce capital employed in stock keeping.

## Experienced partner

in efficient logistic solutions

Over 110 years of presence in the healthcare market, more than 50 years of experience with logistics systems, and over 2000 completed projects worldwide speak for themselves regarding ScanModul®'s experience. For us, professional project management, from analysis and evaluation through conception to the realization, goes without saying. You, the customer, are always in our focus – because your satisfaction is our primary target. In all we do we focus on fulfilling our customers' requirements in the logistical operations process up to the nursing or specialists end users of our solution.

Brilliantly Simple – Simply Brilliant

The idea behind our system is as simple as it is brilliant. Based on a standardized bin size of **400 x 600 mm**, which is dividable, made for Kan-Ban use ("2-Bin"), we can design a highly flexible flow (solution) for a variety of logistics tasks within the hospital ecosystem.

We are the “one partner”  
our clients need

As our client you get one partner to assist you with developing or maintaining the best possible logistical process in your healthcare facility. We work closely with you during every stage of the process, from analysis to implementation. We focus on the non-clinical processes, which when optimized, can result in significant savings in three areas: less inventory spend, reduced clinical staff time as well as reduced waste.

Optimising your facility through  
open communication

The key to our custom-fit solutions is an open communication with our clients. We bring the experience that comes from a century+ working within all departments of hospitals – from the central warehouse up to the operating theatres – and combine that with the knowledge and requirements of medical and logistics professionals. In short, we help our clients to meet the demands of modern medicine through the most efficient supply process possible.

# Let's introduce to you our NoCount® Solution

Simple and highly efficient

The base of our work and also the base of every optimization in the whole logistics supply chain is our NoCount®-Solution. This solution is a highly flexible tool that allows us to improve any possible initial situation according to our customers' wishes. NoCount® is our fully scalable concept of organizing any logistical flow in your healthcare facility. Weather it is to facilitate the daily workflow in a department, or a fully connected and ERP integrated solution; our NoCount® solution fits to any requirement. Together we can determine what serves your needs best. Once installed, you will benefit from time saving, easier replenishment process, increased availability of products, optimized stock levels and reduced waste. And not at least, we care for good ergonomics for the people working with the system.

## A powerfull tool, based on 3 systems

### ISO-Modular-System

The 400 x 600 mm ISO Modular baskets and trays are the core of any logistical concept we develop for our customers. We invented and introduced it to healthcare in the early '70-ies.

### First-in-First-out-System

This idea is essential everywhere high amounts of products are handled. With our solutions you can easily implement this system into your processes due to flexible storage units that e.g. allow a wide variation of possible separations to help employees in their daily business.

### Two-Bin-System

Our Kan-Ban or 2-Bin System uses the simplest visual signal to initiate stock replenishment: an empty box. The trays get divided into two, each side stocked with an equal amount of products. Once a side is empty, the tray gets turned around, allowing the other half of the products to be used. Like this, employees can easily identify the to be replenished empty half with the necessary products.

### Benefits of the NoCount®-Solution:

The combinaton of the Two-Bin-System and the FiFo-System has two significant economies:

- Never run out of products unexpectedly
- Reduced waste of expired products
- Reduced time for replenishment

# Trays, Baskets, Shelves

Efficient storage: be organised and flexible

We have developed an ISO certified modular system for trays and baskets, which optimises the flow of supplies from central storage to the point-of-use. This allows modules – our common name for trays and baskets – to be moved from one place to another instead of picking each item from shelf to shelf. The modules are pivotal in our NoCount® logistic concept.

## Top 5 features

- Our dimensions have become today's ISO standard in healthcare industry
- Pre-perforated for mounting safety stops
- Beaded edge for label holders
- Inserts and partitions for division
- Available in a variety of materials, incl. autoclavable PC withstanding temperatures of up 140°C for short periods of time

# Trays, Baskets and Shelves

## Quick overview

### Trays

Trays are ideal for those purposes where you need a solid product that can be completely sealed with a lid or when you want to make sure that small items or liquids are contained within the module.

### Baskets

Our lightweight baskets have small holes in the sides as well as in the bottom. This enables you to partly see the content without pulling out the module.

### Shelves

We provide shelves in a variety of sizes and materials. Please contact your local sales representative to find the best solution for your need.

## Materials

Most of our trays and baskets are made from grey ABS, which is a sturdy and durable material that withstands cleaning in most washing machines.

We also have a range of transparent trays and baskets in Polycarbonate, Stainless Steel baskets which has the big advantage of being autoclavable at high temperatures, and PPO trays that are resistant to liquid disinfectants and therefore particularly suitable for instruments.

**For more information, please turn to chapter "Material Properties"**

### Dividability ensures flexibility

To ensure the possibility of optimal storage of different and/or smaller items, all our baskets and many trays can be subdivided. This makes handling much easier and clearer. Articles can be removed quickly and easily without mixing. The need to reorder individual articles is thus easy to recognize and can be carried out quickly.

# High-temperature resistant trays

Scandinavia, the front runner of healthcare, has sharpened the demands on the disinfection of trays.

Where continuous washing from 70–85 °C and short term at 90 degrees was previously the norm, now new guidelines state, that trays should be disinfected up to at 93–95 °C, to ensure a higher level of cleanliness. Regular trays in ABS-plastic are not able to withstand washing cycles with temperatures above 85 °C for a longer period of time, leaving CSSD departments unequipped to meet the new standards. Our new quality of high heat trays, can resist temperatures of up to 97 °C, making them completely future proof.

The vibrant green colour makes them stand out from other trays, and easy to recognise.

## Features

- Heat resistant and washable up to 97 °C
- Perfect cleanliness
- High quality
- Future proof
- ISO modular
- Vibrant green

Heat resistant and washable up to

# 97°C

### Material Properties:

Rigid, durable and impact resistant.  
A smooth surface finish and structurally stable

### Temperature:

Max. continuous + 97 °C\*

### Chemical tolerance:

Withstands some weak acid, bases, oil and fats.  
Avoid solvents.

### Cleaning:

In automatic washing machines\* and with most common detergents and disinfectants on the market.

*Material Properties are obtained from our suppliers. This must be considered as a guide and no responsibility can be accepted by ScanModul® for errors and omissions. You can obtain further technical information by approaching ScanModul® directly or one of our representatives.*

*\*Avoid high temperatures and longer delays in washing machines than the suggested figures above.*

# Preconfigured modular inserts

The inserts are available in various sizes. Instruments and other items can be stored in their own individual inserts, depending on their sizes, which prevents them from getting mixed up with other items. The inserts can be removed individually, which allows for quick and easy removal. Just like the modules, the inserts are temperature-resistant up to + 70 °, briefly up to + 90 °.

Center support recommended, when length is more than 1000 mm	1964852

Any other length on request.

# Organising

The innovative and intelligent SCANSlide system simplifies inventory management of goods and consumables, both when using ScanModul's NoCount® supply principle and when using other stockkeeping methods, on shelves in shelving systems.

By simply moving the two signal transmitters and thereby changing the release of the RED, GREEN or YELLOW signal field, the stock status of the stock item, the need for a reorder as well as the needs assessment that has already taken place is displayed.

SCANSlide is available in two versions and can be used in combination with ScanModul® label clips as well as self-adhesive.

*Handles on modules to be inserted in either ScanCell® trolleys, open steel trolleys, transport trolleys or cabinets.*

400 x 600 mm	Lenghtwise insertion	2 x 20	1867594

## Catheter box

The ScanModul® – Catheter box allows easy and flexible access to the catheter – for example directly on the medical trolley. Furthermore, the box is also extremely flexible with regards to the division of the interior and thus offers an interesting extension to standard catheter storage.

*Hinged lid for  
safe and hygienic  
storage*

*Variable division  
for different  
catheters –  
simple and  
flexible storage*

## Hygienic storage

The ScanModul® – Catheter box fulfills the DIN 58593 and thus allows the practical storage of catheters. The cover of the box ensures maximum hygiene and it is easy to clean the box at any time. A safe and hygienic storage is ensured thanks to these features.

## Catheter accessible at any time

Catheter of different sizes and lengths can be stored easily in the ScanModul® Catheter box thanks to adjustable shelves and the variable interior division thanks to movable dividers.

The ScanModul® Catheter box can be fastened in a variety of ways – e.g. directly at the medical trolley or wall rails. No tools are required for assembly which can be completed in seconds.

## Catheter box

# Storage of sterile goods

## Version 1

### Stainless steel grid base for STE containers in combination with telescopic full-extension slides

Container storage on telescopic full-extension slides to accommodate sterile goods containers, in STE format, in tall and base cabinets.

The U-shaped stainless steel grid shelves for STE containers are placed on telescopic pull-outs that can be adjusted in height without tools. The telescopic pull-outs are hooked into the perforated rails.

Alternatively, these mesh shelves can also be inserted into our support wall.

By using StopClips, unintentional slipping out is avoided.

#### Benefits:

- Simple and flexible handling
- Safe and hygienic storage
- Universal use, also for STE-units
- 4 different versions

#### Version 1 – Storage of sterile goods

Description	Item no.
Telescopic full-extension rail (pair), 600 mm for perforated rails, loadable up to 50 kg	1867310
Stainless steel grid bottom for STE container 600 x 400 mm for telescopic full extension slides	2264505
Perforated rails 1900 mm (4 pieces per cabinet necessary)	1864653
Perforated rails 1550 mm (4 pieces per cabinet necessary)	1864654
Perforated rails 900 mm (4 pieces per cabinet necessary)	1864655
Perforated rails 650 mm (4 pieces required per cabinet)	1864656

*Other versions are available on request.*

## Version 2

### Closed stainless steel bottom in combination with telescopic full extension slides

Container storage on telescopic full-extension slides to accommodate sterile goods containers, in STE and ISO format, in tall and base cabinets. The closed stainless steel shelves are placed on telescopic slides that can be adjusted in height without tools. The telescopic slides are hooked into the perforated rails.

#### Version 2 – Storage of sterile goods

Description	Item no.
Telescopic full-extension rail (pair), 600 mm for perforated rail, loadable up to 50 kg	1867310
Stainless steel shelf 600x400 mm for telescopic full extension slides	49106677
Perforated rail 1900 mm (4 pieces per cabinet necessary)	1864653
Perforated rail 1550 mm (4 pieces per cabinet necessary)	1864654
Perforated rail 900 mm (4 pieces per cabinet necessary)	1864655
Perforated rail 650 mm (4 pieces required per cabinet)	1864656

*Other versions are available on request.*

## Version 3

### Closed stainless steel bottom (perforated) in combination with telescopic full extension slides

Container storage on telescopic full-extension slides to accommodate sterile goods containers, in STE and ISO format, in tall and base cabinets. The stainless steel shelves (perforated) are placed on telescopic slides that can be adjusted in height without tools. The telescopic slides are hooked into the perforated rails.

#### Version 3 – Storage of sterile goods

Description	Item no.
Telescopic full-extension rail (pair), 600 mm for perforated rail, loadable up to 50 kg	1867310
Stainless steel shelf, perforated 600x400 mm for telescopic full extension slides	2264507
Perforated rail 1900 mm (4 pieces per cabinet necessary)	1864653
Perforated rail 1550 mm (4 pieces per cabinet necessary)	1864654
Perforated rail 900 mm (4 pieces per cabinet necessary)	1864655
Perforated rail 650 mm (4 pieces required per cabinet)	1864656

*Other versions are available on request.*

# Storage of sterile goods

## Version 4

### Closed HPL solid core bottom with recessed grip at the bottom in combination with telescopic full extension slides

Container storage on telescopic full-extension slides to accommodate sterile goods containers, in STE and ISO format, in tall and base cabinets.

The closed HPL solid-core shelves with recessed grip are placed on telescopic pull-outs that are height-adjustable without tools. The telescopic pull-outs are inserted into the perforated rails. The corresponding holes for placing on our telescopic full-extension slides are not continuous, so the top surface is smooth and therefore easy to clean. A recessed grip on the underside of the base makes it easier to pull out.

### Version 4 – Storage of sterile goods

Description	Item no.
Telescopic full-extension rail (pair), 600 mm for perforated rail, loadable up to 50 kg	1867310
HPL solid core shelf 600 x 400 x 13mm with recessed grip for telescopic full extension slides	226405-S
Perforated rail 1900 mm (4 pieces per cabinet necessary)	1864653
Perforated rail 1550 mm (4 pieces per cabinet necessary)	1864654
Perforated rail 900 mm (4 pieces per cabinet necessary)	1864655
Perforated rail 650 mm (4 pieces required per cabinet)	1864656

*Other versions are available on request.*

# ScanCell®

## The high quality mobile storage solution

ScanCell® is our range of high quality mobile storage solutions that utilises our modular system of trays and baskets. The ScanCell® range is fully customisable and has a wide range of clever accessories which create a wealth of design combinations. ScanCell® products are built from high-quality materials which have been carefully selected to meet rigorous durability targets and strict hygiene criteria.

### Key Benefits

- **Flexible**  
Highly customizable to meet specific job functions and needs
- **Light weight**  
Light weight trolleys for easy handling
- **Ergonomic**  
Job specific trolleys ensure an improved work environment
- **Easy**  
High quality swivel wheels for increased maneuverability
- **Modular**  
Is fully compatible with other ScanModul® products.

ScanCell® Trolley with  
telescopic drawers.  
Type B-M075.  
Item no. 40622550

## The ScanCell® System

The mobility of ScanCell® trolleys enables easier work processes for treatment procedures and greater access to surrounding areas when cleaning. ScanCell® is without a doubt the flagship within mobile storage solutions and we are not surprised that it has been a consistent source of inspiration for many manufactures.

Building on our ISO certified modular system for trays and baskets, you can customise your own trolley from four easy steps.

1. **Choose a front for the trolley.**
2. **Determine the trolley's dimensions.**
3. **Configure the trolley with trays and baskets.**
4. **Improve the trolley with our wide selection of accessories.**

Please see the following page for a simplified overview. The ScanCell® series provides full flexibility in customising a product to meet your criteria and needs, whilst being fully integrated in the overall modular system. With more than 5,000,000 combinations possible ScanCell® offers you a one stop mobile storage solution from the central storage function to the point of usage.

With the ScanCell® system we have catered to all your needs for mobile storage. Each trolley is fitted with four high quality swivel wheels for increased maneuverability. ScanCell® products are built from high-quality materials which have been carefully selected to meet rigorous durability targets and strict hygiene criteria.

The mobile and customisable ScanCell® trolleys enables easier work processes for treatment procedures and better access to surrounding areas when cleaning.

## More Information

Our consultants are available to guide you through our full product range and design specific solutions for your unique storage and logistical needs.

### Top 6 features for ScanCell®

- ScanCell® fully integrates with our modular system
- Equipped with 4 swivel wheels (2 with brakes)
- Hygienic and ergonomic design
- Available in different colours
- Lightweight
- VARIO™ side panels that can be used with relief wheels and safety stops

# The ScanCell® System

**a**

## Three furniture dimensions

To make our trolleys as flexible as possible, the ScanCell® trolleys are available in 3 different sizes.

**b**

In this way, all possible variants of use can be made possible. The use of our modular system is supported in a unique and meaningful way.

**d**

# Sidepanel customization

You have the option to adjust the look and feel of your ScanCell® trolley to your liking. The sidepanels can be customised with one of our standard colours. In addition, you can have them printed with text, such as department information, or even a logo. This allows you to alter the appearance of your new furniture in such a way that it suits your needs, and fits in perfectly with any existing interior.

# Cabinets

## Furniture for storage and workstations

Experience the timeless design of our ISO-modular cabinets and workstations. We tailor our ISO-modular cabinets to your needs. They come in various heights and can be fitted with a wide array of features and accessories, such as locks and telescopic pull-out trays.

### Top 5 features

- Rounded edge strip for better protection
- Doors can be delivered with glass, which allow a quick overview of the contents
- Telescopic runners with 110% pull-out grant easy access to the contents.
- The hinges allow the doors to open 270°
- Quiet, magnetic lock

*Cleanline Cabinets  
for safe and efficient  
storage*

## Cleanline cabinets

Experience the timeless design of our ISO-modular cabinets

The minimalistic, modern style of our Cleanline cabinets gives a visual calmness to the surrounding environment. The design is timeless, and they can be tailored to guarantee a perfect fit for any room. This gives you the ability to let them blend in perfectly with the building, or pre-existing furniture arrangements.

The CleanLine series can be easily recognised by the laminated doors, with soft rounded edges and the vertical handle in anodised aluminium.

Behind this calm appearance hides the potential for a highly efficient and organized interior. Each cabinet can be arranged and re-arranged with our ISO-modular baskets, shelves, trays, and other accessories, so that everything has its place.

*40/60 modular drawers with 110 %  
pull out on telescopic runners*

*Instrument cabinets combined with drawer cabinets*

# Cleanline cabinets – features

## Front options

---

### Open front

An open front allows easy access to the cabinet's contents.

### Door

The doors are made from 16 mm chipboard faced with 0.7 mm high-pressure laminate.

### Glass door

Hardened glass fitted in a solid frame without joints.

### Roller front

A roller front is the ideal solution for rooms where there is limited space for opening doors.

### Drawer cabinets

Drawer cabinets are practical for storing smaller items, and we have many different sizes to match your needs. All drawer cabinets are delivered with soft-close as standard.

### Drawers

We offer two types of drawers:

1. Pull-out drawers for modules with full pull-out, soft-close. These are designed for our standard 40/60 trays and baskets.
2. Drawers with melamine bottom and steel side panels; also with full pull-out, soft-close a full-stop.

# Cabinet Specifications

## Standard cabinet modules

The sides, top, and bottom of the cabinets are made from 19 mm chipboard, faced with melamine (100 g/m<sup>2</sup>) on both sides and fitted with a 6 mm back panel. All edges are provided with 1 mm ABS plastic profiles. The front edges have an integrated dust seal, with beading for cabinets with doors, and without beading for open front cabinets.

## Infill panels

The infill panels ensure a perfect fit when the cabinets are installed. They are made from 19 mm chipboard faced on both sides with melamine.

The infill panels can be provided with a front panel, high pressure laminated in the same colour as the cabinet door.

### Hinges

The unique hinge is made from anodised aluminium. The hinge is provided with plain bushings, which minimises wear and is optimal for many years of daily use. The opening angle is 270 degrees.

### Edge strip

The rounded grey plastic edge strip protects the laminate from blows.

### Magnetic lock

The lock system is equipped with a nylon magnetic lock as standard.

### Doors & drawer fronts

CleanLine doors and drawer fronts are characterised by their rounded corners. They are made from 16 mm chipboard faced with 0.7 mm high-pressure laminate on both sides.

### Plinth

The plinths are made of 18 mm water resistant plywood with 0.7 mm laminate, in the colour F2297 Terril, dark grey. The plinths are delivered with levelling feet as standard. If a shared plinth is required, this is delivered without levelling feet.

### Handles

The 160 mm vertical anodised aluminium handle completes the exclusive CleanLine design.

# Cleanline cabinets

## Drawers

Drawers have side panels made of powder painted steel and can be fully pulled out. Drawer bottoms and backpieces are made of 16 mm melamine, and all visible edges are provided with bonded polypropylene edge strips.

Drawer runners are fitted using Euro screws. The drawers can be removed, have inbuilt stop and bear loads up to 30 kg. The drawer sides match the height of the fronts. Drawers for modules are also available with full pull-out and soft-close.

## Underbench cabinets with castors

Underbench cabinets with castors are called mobile units. The height of these mobile units is 88 mm, and the front castors are fitted with brakes.

## Locks

The majority of the cabinet models can be fitted with different lock types. The most popular option is a lock that works with a numeric code, but we offer locks with keys as well.

## Cabinet fittings

The various options with which our cabinets' side panels can be fitted.

- VarioTilt side panels provide flexible storage based on the ISO storage systems with 40 x 60 cm trays and baskets
- Telescopic runners, when you need drawers with easy access
- Regular shelves for basic storage needs

We also offer solutions with a combination of these options.

Many of the cabinets in the product overview already include cabinet side panels or telescopic runners, but, if you wish to buy these separately, they are listed at the end of the product overview in this chapter.

### Variotilt cabinet side panels

Injection moulded cabinet side panel for horizontal inserts.

This side panel allows the trays to be pulled out and tilted downwards, to provide easier access to its contents.

They are fitted with a build-in stop function and can be fitted with removable load relief wheels at the front edge of the panel, which make it easier to pull out trays that hold heavy products.

Injection moulding is more durable than the traditional vacuum moulded version. The maximum load is 20 kg per insert.

### Telescopic runners

Stainless steel telescopic runners, fitted on perforated rails.

The perforated rails can be adjusted to 25 mm spacing. This solution is recommended for the storage of heavy products, for which 110 % pull-out is required. These are often fitted in cabinets, from the working height down to the floor.

Our trays and baskets can be placed directly on the telescopic runners without any need for additional tools.

The maximum load is 50 kg per insert. Many of the cabinets in the product overview already include cabinet side panels or telescopic runners, but can be purchased separately.

# Fire-retardant/lead protected cabinets

Fire-retardant/ lead protected cabinets/pass-through cabinets are used in corridors between the corridor and rooms, for example, cleaning rooms, wards, operating theatres, medicine rooms etc.

## Approval

According to the Fire Resistance Assessment – from the Danish Institute of Fire and Security Technology – 17.06.2004, the cabinets comply with the requirements in DS 1051.2 for a BD pass-through cabinet 30 (test report B 17640 b). The doors have Danish Standard certification license number 671E. The relevant assessment is available. It should be noted that the responsible local fire authority should always be contacted for final approval before commissioning.

## Technical specification

The cabinet/pass-through cabinet comprises a standard cabinet/pass-through cabinet, where one cabinet door is replaced by a single-leaf door – panel thickness 40 mm. On the outside of the door leaf, a 19 mm Cleanline cabinet door is affixed. The fire doors are fitted with a vertical door handle latch, which is activated by turning the handle.

If the cabinet is to be delivered without plinth, a moulding on the outer door and a steel moulding, which is milled in, and fastened to, the floor, are enclosed. The joints between pass-through cabinets and adjoining building elements are filled with stone wool, which is enclosed.

## Lead protection

When the cabinet is installed between a corridor and an operating theatre, normally the cabinet needs to be lead protected. This is to avoid any radiation penetrating the cabinet from the operating room to people in the corridor. This is done by including 2 mm lead in the door and the frame around the door. In addition to this, additional lead is installed between frame of the door and wall, connecting the lead protection within the wall, with the cabinet.

Whether you need a fire-retardant cabinet, a lead protected cabinet or a combination, the outside measurements of the pass-through cabinet, are the same.

*40/60 modular pass-through cabinet*

*40/60 modular lead and fire protected pass-through cabinets, seen from the outside of the OR room*

## Cabinet dimensions

# Mechanical interlock system

Scan Modul's cabinet range for the hospital sector consists of tall cabinets for both wall mounting and as pass-through cabinets.

## Safe handling with lock system

The interlock is designed for cabinets with access from both sides, where the mechanical locking system ensures that the cabinet only can open from one side at a time.

The locking system works without connection of electricity and is based on a single mechanical principle with few moving parts, giving a very stable and secure function.

**The interlock system has been tested with 500.000 openings.**

## Mounted items

Some of our products can also be mounted on the wall

### Wall mounted shelves

The ScanModul® wall mounted shelving system for fixing direct on walls. Epoxy painted rails guarantee high stability. The shelves are available in three types of finish: melamine, laminate or as epoxy painted steel.

### Wall mounted ScanCell® / ScanCell® on plinth:

Range of fixed or wall cabinets has been designed for sensitive areas like OR and CSSD. They are in aluminium and ABS with an PVC plinth for the fixed facilitating cleaning in the room.

*Wall mounted height adjustable shelving*

# Height-adjustable tables

Smart storage solutions to make the most of your workspace

Meet the demands of modern medicine with our smart storage solutions. Our ergonomic worktables are adjustable in height, can carry heavy loads and can be customised to ensure a perfect fit. Let's make the most of the space that you have.

## Single barrel height-adjustable table

This ergonomic worktable is specifically designed for the use of laptops. There's room between the bars and the walls, which allows space for electricity cables and sockets. The height can be adjusted within a range of 500mm, making it convenient for users of any height.

This item is available in a variety of different sizes. Please contact your sales representative for more information about the options.

Description					
This item includes a white laminate worktop. Other sizes on request.					
Colour	Depth	Width	Height range	Max. weightload	Item no.
White RAL 9016	600 mm	800 mm	690 – 1190 mm	80 kg	2620609

**Height adjustable table for desktop computers**

The design of this worktable allows for convenient use of desktop computers. There's a dedicated space for the keyboard underneath the tabletop, and the lower bar gives support to the computer case. It can lift up to 80 kg's and is adjustable in height.

This item is available in a variety of different sizes. Please contact your sales representative for more information about the options.

**Description**

This item includes a pull-out table for a keyboard. Other sizes on request.

Colour	Depth	Width	Height range	Max. weightload	Item no.
White RAL 9016	600 mm	800 mm	690 – 1190 mm	80 kg	2620619

**Double barrel height-adjustable table**

This ergonomic working table was built to support a heavier workload. With its double-barrels it can carry up to 125kg.

This item is available in a variety of different sizes. Please contact your sales representative for more information about the options.

**Description**

This item includes a white laminate worktop. Other sizes on request.

Colour	Depth	Width	Height range	Max. weightload	Item no.
White RAL 9016	700 mm	1200 mm	450 – 900 mm	125 kg	2620604

## Stainless steel table tops

ScanModul® delivers table tops in stainless steel in both AISI304 and AISI316 quality, depending on the usage. Table tops can be delivered included sinks if needed. As standard, table tops are delivered with a bead edge on all 4 sides. They can be installed both on top of cabinets and wall hung on stainless steel or painted brackets.

*Stainless steel table top with sink*

*Raised edge  
on stainless steel  
table top*

# Transport solutions

## Carts for the safe transportation of medical supplies

Whether you go for a lightweight distribution trolley, open or closed, steel or aluminum, all our transportation solutions are ergonomically designed and guaranteed to make transportation effortless.

As with all of our products, every trolley can be customized with accessories to ensure a perfect fit, specifically for you.

### Key Benefits

- A wide variety of trolleys for a wide variety of applications
- Easily maneuverable
- Safe transportation guaranteed
- Durable and flexible
- Customizable with a wide range of accessories

# Medical transport solutions

For any professional requirements

A wide variety of transport trolleys are used in the different areas of a clinic. ScanModul's transport solution offers useful and flexible trolleys for all areas to support the work as efficiently as possible. All trolleys can of course be equipped with the ScanModul modular system and thus offer a useful extension of the entire system.

## Closed Transport

Safe transportation with the best possible protection

## Open Transport

Carts for safe transportation of medical supplies and waste

## Open Steel

Carts for easy transportation of simple medical supplies or devices

## Lightweight distribution trolleys

Carts for easy transportation of simple medical supplies or devices

### Characteristics

Our lightweight distribution trolleys are made of powder coated, square, metal tubing. The design allows for easy access to the baskets, and they're available with high ground clearance so that you don't bump your legs. They're ideal for simple, light transport.

## Examples of sets

Have a look at the most popular combinations of products to give you a sense of direction in a sea of possible combinations.

# Pre-configured lightweight distribution trolleys

Lightweight distribution trolleys – carefully selected for your needs.

# Open transportation trolleys

## Transportation made easy

With solid handles and wheels our open transport trolleys offer superb maneuverability. The trolleys are available in one, two or three sections with 10 pairs of VARIO support rails in every section. All trolleys are made of powder coated square metal tubing and designed to provide easy access to the modules from both sides. Naturally, the transport trolleys are fully compatible with our modular system.

### Stainless Steel

Our open transport trolleys are also available in Stainless Steel – please contact your local office or representative for more information.

### Top 5 Features

- 4 swivel wheels and 4 bumper wheels
- Made of 20 x 20 mm powder coated metal profiles
- Truck coupling device and coupling hook available
- Open transport carts can be equipped with lockable bars.
- Optional fitting of VARIO™ relief wheels that makes it easy to pull out heavy trays or baskets

## Stationary and mobile shelving solutions

Our fully customizable solutions and large range of products allow us to meet any individual and demanding storage requirement.

### Key Benefits

- Maximum flexibility through modular ScanMo™ concept
- Individually configurable
- Easy handling due to ergonomic shelf design
- Compatible with all ScanModul® modules
- Even more efficient in combination with the NoCount® logistics concept

# The ScanMo™ Concept

## Maximum flexibility thanks to modular unit approach

ScanMo™ is a flexible, modular racking system, which supports both angled and horizontal insertion. They free up valuable floor space and allow for easy access and adhere to the ISO modular standard, which means it's compatible with all our modules.

### ScanMo™ Racks

You can design your own ScanMo™ Rack with our “unit approach”. Start with a single unit and then choose the desired add-on units until you reach the desired size. On the following pages you'll find some examples of ScanMo™ Rack configurations.

Need an odd-size? Not a problem. Contact us via the contact details on the last page of our catalogue.

#### Top 5 features

- Easy adjustable rails
- Angled position of top supports gives easy access to items stored in higher places
- Extended shelves for the storage of larger items
- Stops in front and rear ensure safe storage and use of modules
- Customisable system allows a combination of shelves and modules

**ScanMo™ Racks are made of 41 mm coated steel.**  
**Available in two depths:**

**a**

Type A =  
Depth 665 mm

**b**

Type B =  
Depth 465 mm

Single Unit

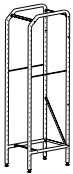

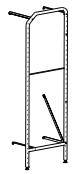

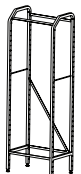

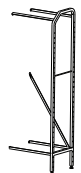

Angled  
Support Rails

# ScanMo™ – racks overview

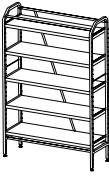

## Racks for trays and baskets

Name		Description	Width	Depth	Height	Pcs.	Item no.
<b>a</b> CMA-RSM-600 Single unit		2 side frames, 1 stabilizer kit, incl. installation material	475 mm	665 mm	2020 mm	2	1671608
						1	1671611
						2	1671000
<b>a</b> CMA-RAM-600 Add-on unit		1 side frame, 1 stabilizer kit, incl. installation material	455 mm	665 mm	2020 mm	1	1671608
						1	1671611
						1	1671000
<b>b</b> CMA-RSM-400 Single unit		2 side frames, 1 stabilizer kit, incl. installation material	675 mm	465 mm	2020 mm	2	1671408
						1	1671411
						2	1671000
<b>b</b> CMA-RAM-400 Add-on unit		1 side frame, 1 stabilizer kit, incl. installation material	645 mm	465 mm	2020 mm	1	1671408
						1	1671411
						1	1671000

## Accessories

Name	Description	Height	Width	Depth	Item no.
Wheels for ScanMo™ Rack	Set of 2 x Ø 75 mm swivel wheels. 1 with brakes, 1 without brakes		625 mm		1671090
Support Kit	Horizontal support kit Type A 600mm (1 left & 1 right support)		1060 mm		1671665
Support Kit	Horizontal support kit Type B 400mm (1 left & 1 right support)		1500 mm		1671445
Support Kit	Angled support kit Type A 600mm (1 left & 1 right support)		1500 mm		1671666
Support Kit	Angled support kit Type B 400mm (1 left & 1 right support)		1500 mm		1671446
Shelf	Type A shelf, coated steel	41 mm	850 mm	660 mm	1671620
Shelf	Type B shelf, coated steel	41 mm	1265 mm	445 mm	1671420

## Racks for shelves

Name		Description	Width	Depth	Height	Pcs.	Item no.
<b>a</b> CMA-RSS-600 Single unit		2 side frames, 1 stabilizer kit, incl. installation material	915 mm	665 mm	2020 mm	2	1671608
						1	1671617
						2	1671000
<b>a</b> CMA-RAS-600 Add-on unit		1 side frame, 1 stabilizer kit, incl. installation material	885 mm	665 mm	2020 mm	1	1671608
						1	1671617
						1	1671000
<b>b</b> CMA-RSS-400 Single unit		2 side frames, 1 stabilizer kit, incl. installation material	1320 mm	465 mm	2020 mm	2	1671408
						1	1671417
						2	1671000
<b>b</b> CMA-RAS-400 Add-on unit		1 side frame, 1 stabilizer kit, incl. installation material	1290 mm	465 mm	2020 mm	1	1671408
						1	1671417
						1	1671000

## ScanMo™ – workstation

The perfect combination of shelf and workplace

The ScanMo™ Workstation is a worktop built directly into the shelf. Ideal for sorting materials or preparing them for further transport. Very often this solution is used in the central pharmacy, or even in the warehouse.

### Top 4 features

- Powder coated steel
- Fiber-glass reinforced nylon slides
- Melamin worktop with upstand, easy to clean
- Ergonomic working height

Type AAA configured

## ScanMo™ – wire shelves

### The lightweight among the shelves

Lightweight and flexible – and of course combinable with our complete shelving system.

The Wire shelves are made of chrome coated steel and therefore - despite their light weight – very robust and durable.

This type of shelf can also be delivered on wheels to increase flexibility.

#### Top 5 features

- Chrome coated steel wire
- Compatible to all ScanMo™-Racks
- Lightweight
- Mobile (with standard wheels of 75 mm) or fixed
- Corner unit available

Add-on unit > Add-on unit > Starter unit

Direct fix with bolt and nut to the side frame. Width beams set redundant

**Easy to assemble – flexible in use.**  
**ScanMo™ Wire shelves offer you maximum flexibility for every application.**

Corner unit – fixed easily with hooks

Also available with clickable telescopic rails for heavy loads. Recommended to be used on the bottom part of the racks.

Highly stable: Capacity per shelf: 100 KG  
 Capacity per section: 400KG

Steel powder coated table top holder, Type BB – length 462, set	1691114
<i>No single sale possible.</i>	
<i>Only with ScanMo™ Workstation.</i>	

# Material properties

Carefully selected materials for highest hygiene and durability

Our materials are carefully selected to ensure optimal functionality and a long lifetime. A hospital environment, intensive use, and efficient cleaning methods require certain material properties for various purposes. You are always welcome to contact your local office for advice on which product types that are best suited for your specific use.

# Material description

## Acrylnitrile-butadiene-styrene

### Material Properties:

Rigid, durable and impact resistant.  
A smooth surface finish and structurally stable.

### Temperature:

Max. continuous + 70°C  
Max. short-term. + 90°C

### Chemical tolerance:

Withstands some weak acid, bases, oil and fats.  
Avoid solvents.

### Cleaning:

In automatic washing machines\* and with most common detergents and disinfectants on the market.

## Polymethylmethacrylate

### Material Properties:

Rigid and durable clarity with 90 % light transmission, UV-stable.

### Temperature:

Max. continuous + 70°C  
Max. short-term. + 90°C

### Chemical tolerance:

Withstands weak acid, bases and non polar solvents.

### Cleaning:

In automatic washing machines\* and with most common detergents and disinfectants on the market.

## Epoxy

### Material Properties:

Used as powder coating on steel, good mechanical strength, hard and durable.

### Temperature:

Max. continuous + 100°C  
Max. short-term. + 120°C

### Chemical tolerance:

Resistant against bases and limited resistance against strong acid.

### Cleaning:

In automatic washing machines\* and with most common detergents and disinfectants on the market.

## Polyphenylenoxide

### Material Properties:

Abrasion resistant, durable and hard, structurally stable.

### Temperature:

Max. continuous + 110°C  
Max. short-term. + 120°C

### Chemical tolerance:

Withstands weak acid and bases. Avoid solvents.

### Cleaning:

In automatic washing machines\* and with most common detergents and disinfectants on the market.

## Laminate

### Material Properties:

Sturdy and durable surface, withstands normal impact influences.

### Temperature:

Max. continuous + 150°C  
Max. short-term. + 180°C

### Chemical tolerance:

Limited resistance against weak acid and bases.

### Cleaning:

Wipe clean with damp cloth.

## Polystyrene

### Material Properties:

Rigid, durable and impact resistant.

### Temperature:

Max. continuous + 60°C  
Max. short-term. + 65°C

### Chemical tolerance:

Resistant against water, acids and bases. No strong oxidized acids.

### Cleaning:

In automatic washing machines\* and with most common detergents and disinfectants on the market.

## Melamine

### Material Properties:

Durable, withstands light impact.

### Temperature:

Max. not over + 40°C

### Chemical tolerance:

Limited resistance against weak acid and bases.

### Cleaning:

Do not wash in automatic washing machines, wipe off with the most common detergents and disinfectants on the market.

## Polyamid

### Material Properties:

High impact resistance, durable, withstands constant bending.

### Temperature:

Max. continuous + 105°C

Max. short-term. + 150°C

### Chemical tolerance:

Resistant against fuels, lubricants and some solvents.

### Cleaning:

In automatic washing machines\* and with most common detergents and disinfectants on the market.

## Polycarbonate

### Material Properties:

Stiff, durable. Highly impact resistant. Virtually unbreakable. Autoclaveable.

### Temperature:

Max. continuous + 122°C

Max. short-term. + 140°C

### Chemical tolerance:

Resistant against oils and fats. Poor towards strong acids and bases.

### Cleaning:

In automatic washing machines\* and with most common detergents and disinfectants on the market.

## Polyvinylchloride

### Material Properties:

Rigid and durable. When stabilised becomes highly impact resistant. Smooth surface finish.

### Temperature:

Max. continuous + 60°C

Max. short-term. + 75°C

### Chemical tolerance:

Resistant against acids and bases. Limited use with some solvents.

### Cleaning:

In automatic washing machines\* and with most common detergents and disinfectants on the market.

## Stainless steel

### Material Properties:

Stainless steel type AISI304

### Temperature:

Resistant to all temperatures in the clinical sector

### Cleaning:

In automatic washing machines\* and with most common detergents and disinfectants on the market.

**Material Properties are obtained from our suppliers. This must be considered as a guide and no responsibility can be accepted by ScanModul® for errors and omissions. You can obtain further technical information by approaching ScanModul® directly or one of our representatives.**

*\*Avoid high temperatures and longer delays in washing machines than the suggested figures above.*
